DirectRxGuide.com

Product Requirements Document

Version 1.0 | March 2026 | MVP Launch

The first independent, pharmacist-built aggregator
of direct-to-patient prescription drug programs in the United States.

Document Metadata

Field	Detail
Product Name	DirectRxGuide.com
Document Type	Product Requirements Document (PRD)
Version	1.0 — MVP
Author	Jitin (PharmD)
Status	Draft — Ready for Build
Domain	DirectRxGuide.com (registered via Namecheap)
DNS	Cloudflare
Hosting	Vercel (free tier)
Database	Supabase (free tier)
Analytics	Google Analytics 4
Newsletter	TBD (Beehiiv / Mailchimp)
Target Launch	6 weeks from build start

1. Product Overview

1.1 Mission Statement

DirectRxGuide.com is the first independent, pharmacist-built platform that aggregates, compares, and simplifies access to every direct-to-patient (DTP) prescription drug program in the United States. The platform exists because patients deserve a neutral guide — not a manufacturer storefront — and because no existing resource closes the gap between the programs that exist and the patients who need them.

1.2 The Problem

- TrumpRx.gov (launched February 2026) covers only 43-54 drugs from manufacturers who signed Most Favored Nation deals with the White House — leaving the majority of DTP programs completely unlisted.
- AmericasMedicines.com (PhRMA) is industry-funded and carries inherent bias concerns, with no clinical comparison data.
- Manufacturer DTP sites (LillyDirect, NovoCare, PfizerForAll) only show their own drugs — no cross-manufacturer comparison exists.
- GoodRx is coupon-focused and insurance/PBM-adjacent — not built for DTP program navigation.
- 40% of Americans have skipped or delayed a prescription due to financial concerns (Model N, 2025).
- HCPs report significant difficulty tracking which DTP programs exist and which patients qualify.

1.3 The Solution

DirectRxGuide.com provides three things no other platform offers simultaneously: (1) a comprehensive, cross-manufacturer DTP program directory covering every active program regardless of political deal status; (2) a clinical drug comparison tool that goes beyond price to include efficacy, safety, and administration data; and (3) a universal eligibility checker that gives patients and HCPs personalized, ranked DTP recommendations in under two minutes.

1.4 Positioning Statement

Platform Positioning

"The only independent, pharmacist-built platform that cuts through pharma bias to help patients and providers discover, compare, and access every direct-to-patient prescription drug program in the United States — because patients deserve a neutral guide, not a manufacturer storefront."

2. User Personas

2.1 Primary User — Healthcare Provider (HCP)

Attribute	Detail
Who	Physicians, pharmacists, nurse practitioners, physician assistants
Goal	Quickly identify which DTP programs exist for a specific patient's condition and situation
Pain Point	No single reference covers all programs; manufacturer sites are biased; TrumpRx is incomplete
Device	Primarily desktop — using during or between patient appointments
Key Features Needed	Drug comparison grid, program directory, HCP education section, PDF export
Trust Signal	PharmD authorship, clinical data depth, independence from manufacturer funding

2.2 Secondary User — Patient

Attribute	Detail
Who	Uninsured, underinsured, high-deductible plan holders, GLP-1 seekers, fertility patients
Goal	Find the cheapest legitimate way to access their medication directly from the manufacturer
Pain Point	Confused by manufacturer sites, skeptical of TrumpRx, don't know all options exist
Device	Mobile-first — searching on phone, often while at or after a doctor's appointment
Key Features Needed	Eligibility checker, clear pricing, direct links to manufacturer programs
Trust Signal	No pharma funding badge, plain language, independent framing

2.3 Tertiary User — Employer Benefits / Consultant

Attribute	Detail
Who	HR benefits managers, health plan consultants, patient advocacy organizations
Goal	Understand the DTP landscape to advise employees or clients on cost-saving options

Attribute	Detail
Pain Point	No neutral aggregated resource exists for benefits strategy purposes
Device	Desktop
Key Features Needed	Program directory, comparison data, HCP tools, newsletter
Trust Signal	Independence, data accuracy, PharmD credibility

3. Feature Specifications — MVP (v1)

The MVP consists of five core features. All P0 items must ship at launch. P1 items ship in Month 2. P2 items ship Month 4+.

3.1 Homepage

Element	Requirement	Priority
Hero Section	Headline: "Find the best DTP prescription drug program for you." Subheadline: "Independent. Unbiased. Pharmacist-built." Primary CTA button: "Check Your Eligibility" (links to eligibility checker). Secondary CTA: "Compare Drugs" (links to comparison tool).	P0
Quick Search Bar	Search by drug name, condition, or manufacturer. Auto-suggest dropdown showing matching results. On selection, routes to matching drug comparison page or program directory filtered result.	P0
Trust Indicators	Prominent badge row: "Independent" | "No Pharma Funding" | "PharmD-Built" | "Updated Bi-Weekly". Links to About page and Privacy Policy.	P0
Featured Programs	Rotating cards (4-6) showing top DTP programs with logo, key drugs, and cash price range. Links to individual program profile pages.	P0
HCP Navigation Badge	Persistent banner or badge: "Healthcare Provider? Access clinical tools →" Links to HCP section.	P0
Latest Updates Ticker	3-5 recent DTP news headlines with dates. Updated manually bi-weekly.	P1
Newsletter Signup	Email capture with single field. "Get weekly DTP updates" copy. Connects to newsletter platform.	P1

3.2 Universal Eligibility Checker

The eligibility checker is the platform's highest-value feature and primary data collection mechanism. It runs entirely client-side — no user data is transmitted until the anonymous session log fires on completion. A privacy notice is displayed before Step 1.

Privacy Notice (displayed before Step 1)

Your Privacy is Protected

This tool does not collect your name, contact information, insurance ID, or any information that identifies you personally. Your answers are used only to generate your personalized DTP program results and are stored anonymously to help us improve this tool. We are not a healthcare provider and this tool does not constitute medical advice. Always consult your healthcare provider before changing how you obtain or pay for your medications.

Step Flow

Step	Input Type	Options / Behavior	Data Logged to Supabase
Step 1: Condition	Searchable dropdown	GLP-1/Obesity, Diabetes, Migraine, Psoriasis, RA, Cholesterol, Blood Thinners, Fertility, Asthma/COPD, Other	condition_selected
Step 2: Insurance Status	Single select buttons	Uninsured | Underinsured | High-Deductible Plan | Employer-Sponsored | Medicare | Medicaid | Other	insurance_status
Step 3: Current Medications	Optional free text only	Not required to proceed. Labeled "Optional — helps us identify alternatives". Text input only — not stored in Supabase. Used only to display a note on results page if relevant.	Not stored
Step 4: State of Residence	Searchable dropdown	All 50 US states. Filters results by state-level DTP pharmacy availability.	state_selected
Step 5: Monthly Budget	Slider or button select	$0-100 | $100-200 | $200-400 | $400-600 | $600+	budget_range
Results Page	Output display	Ranked list of eligible DTP programs. Ranked by lowest cash price first. Each result shows: program name, drug name, cash price, eligibility note, direct link to manufacturer site (opens new tab with exit disclaimer overlay).	top_drug_output, dtp_program_clicked

Results Page Requirements

- Results ranked by lowest cash price first.

- Each result card shows: program name and logo, drug name and dose, DTP cash price per month, eligibility fit note (e.g., "Good match — works for uninsured patients in TX"), and a "Go to [Program Name]" button.
- Outbound links open in a new tab with a brief exit disclaimer overlay: "You are leaving DirectRxGuide.com. The following site is operated by [Manufacturer]. DirectRxGuide has no financial relationship with this program."
- Results page shows a "Save or Share Results" option — generates a shareable URL with results encoded (no PII).
- "Not finding what you need? See all programs →" link to program directory.

Data Architecture — Eligibility Checker

Layer	Tool	What Is Captured	Cost
GA4 Events	Google Analytics 4	Each step completion, drop-off rates, results page views, outbound clicks	Free
Session Log	Supabase	Anonymous row: session_id, condition, insurance_status, state, budget_range, top_drug_output, dtp_program_clicked	Free tier
Outbound UTM	URL parameters	utm_source=directrxguide, utm_medium=eligibility_checker, utm_campaign=[condition]	Free

3.3 Drug Comparison Tool

The drug comparison tool is the platform's core clinical differentiator. No existing platform offers side-by-side clinical comparison of DTP-available drugs across brand name, efficacy, safety, and DTP pricing simultaneously.

Launch Scope — v1

At launch, the comparison tool covers 3 therapeutic areas: GLP-1/Obesity, Migraine, and Diabetes. Users may only compare drugs within the same condition category at launch. Cross-condition comparison is a v2 feature.

Comparison Grid — Column Specifications

Column	Data Type	Source	Required at Launch
Brand Name	Text	FDA label	Yes
Generic Name	Text	FDA label	Yes
Manufacturer	Text	Manufacturer	Yes
DTP Platform	Text + Link	Manufacturer DTP site	Yes

Column	Data Type	Source	Required at Launch
DTP Cash Price	Currency ($/month)	Manufacturer DTP site — updated bi-weekly	Yes
Dosage Forms Available	Text list	FDA label	Yes
Administration Route	Text (oral/injectable/inhaler)	FDA label	Yes
Dosing Frequency	Text	FDA label	Yes
Key Efficacy Data	1-2 sentence summary	PharmD-authored from FDA label/trials	Yes
Common Side Effects	Bullet list (top 5)	FDA label	Yes
Black Box Warnings	Text — highlighted if present	FDA label	Yes
Key Contraindications	Text	FDA label	Yes
Insurance Accepted at DTP	Yes / No / Limited	Manufacturer DTP site	Yes
TrumpRx Listed	Yes / No	TrumpRx.gov	Yes
Last Price Verified	Date	Internal review log	Yes

Filter Options

- Price range slider ($ per month)
- Administration route: Oral | Injectable | Inhaler | Topical
- Dosing frequency: Daily | Weekly | Monthly | As needed
- TrumpRx listed: Yes / No
- Insurance accepted at DTP: Yes / No / Limited

Direct Link Buttons

Each drug card includes a "Go to [Program Name]" button. All outbound links open in a new tab with exit disclaimer overlay (same as eligibility checker). UTM parameters applied to all outbound links.

v1 Exclusions (build in v2)

- Savings calculator (input current OOP cost, output projected DTP savings)
- PDF export for HCP drug comparisons
- Cross-condition comparison

3.4 DTP Program Directory

The program directory is the platform's SEO engine. Each program profile page targets long-tail navigational searches (e.g., "LillyDirect eligibility requirements", "NovoCare Wegovy price 2026") and is structured as a standalone authoritative reference.

Launch Programs — v1 (8 profiles)

Program	Manufacturer	Key Drugs	Status
LillyDirect	Eli Lilly	Zepbound, Mounjaro, Emgality, Jardiance	Active since Jan 2024
NovoCare Pharmacy	Novo Nordisk	Wegovy, Ozempic	Active since Mar 2025
PfizerForAll	Pfizer	Nurtec, Paxlovid, Eliquis, vaccines	Active since Aug 2024
AstraZeneca Direct	AstraZeneca	Farxiga, Airsupra, Xigduo XR	Active since Oct 2025
AmgenNow	Amgen	Repatha, Aimovig	Active since Oct 2025
BMS Patient Connect	Bristol Myers Squibb	Sotyktu, Eliquis (with Pfizer)	Active since Jan 2026
Novartis DTP	Novartis	Cosentyx	Active since Nov 2025
TrumpRx.gov	Federal Government	43-54 drugs from 6+ manufacturers	Active since Feb 2026

Each Profile Page Must Include

- Program overview: what it is, who runs it, when it launched, independence status
- Eligible conditions and available medications with current DTP cash pricing
- Step-by-step enrollment guide
- Eligibility requirements (insurance status, residency, income if applicable)
- Telehealth partner information if applicable
- Shipping and delivery details
- Insurance acceptance policy
- State availability notes (especially CA and MA coupon restrictions)
- Direct link to manufacturer DTP site (new tab + exit disclaimer)
- Last updated date (bi-weekly review required)
- Key Facts Summary Block: 4-6 atomic statements at top of page
- FAQ section: 4-6 Q&A pairs marked up with FAQPage schema

Data Management

Drug prices and program details are maintained in a Google Sheet (the platform's master drug database). The sheet is updated manually by the PharmD author on a bi-weekly basis. Claude assists with research and updates during review sessions. Pages display a "Last Verified" date and a "Pending Review" flag if not updated within 30 days.

3.5 Education Hub

Patient Education — Launch Content (P0)

Article	Primary Keyword Target	Content Standard
What Is DTP Prescribing?	"what is direct to patient prescribing"	Definitional page — atomic statement opening, FAQ section, MedicalWebPage schema
DTP vs. Traditional Pharmacy	"DTP pharmacy vs retail pharmacy"	Comparison page — structured table, atomic summary block
Is DTP Right for Me?	"is direct to patient pharmacy right for me"	Decision guide — interactive quiz style, eligibility checker CTA
Understanding DTP Pricing	"how does DTP cash pricing work"	Educational — explains list price vs cash price vs insurance, atomic statements
Safety Considerations	"DTP pharmacy safety medication reconciliation"	Clinical — written at patient level, references PCP consultation
GLP-1 Buyer's Guide	"cheapest GLP-1 weight loss drug 2026"	Comparison page — Zepbound vs Wegovy vs alternatives, full comparison table

HCP Education — Launch Content (P0)

Article	Primary Keyword Target	Audience
DTP Clinical Reference Guide	"DTP prescribing guide for pharmacists"	Pharmacists, physicians, NPs, PAs
Medication Reconciliation & DTP	"medication reconciliation DTP purchased drugs"	Clinical pharmacists, hospital teams
Talking to Patients About DTP	"how to counsel patients on DTP options"	All HCPs

Content Standard — All Articles

Every article must follow the standard 8-element structure defined in the SEO & LLM strategy: (1) Page Header with PharmD author and dates, (2) Key Facts Summary Block of 4-6 atomic statements, (3) Introduction paragraph, (4) Main content body with H2/H3 structure, (5) Comparison table where applicable, (6) FAQ section with FAQPage schema, (7) Sources and last updated date, (8) Related content internal links (minimum 3).

4. Design Requirements

4.1 Visual Direction

Attribute	Decision
Overall Feel	Warm and accessible — like a patient-friendly health app. Approachable, not intimidating. Clinical credibility without feeling like a government site or pharma ad.
Color Palette	Teal and white — modern and fresh. Primary: teal (#0D9488 or similar). Secondary: white and light gray. Accent: deep navy for text and authority elements.
Typography	Clean sans-serif (Inter or similar). Clear hierarchy. Readable at all sizes.
Mobile Priority	Equal priority for mobile and desktop from day one. Responsive design required. Eligibility checker must be fully functional on mobile.
Imagery	No stock pharma photos. Use icons, illustrations, and data visualizations. Warm, human, accessible visual language.
Logo / Brand Mark	To be developed. Should incorporate Rx symbol or pill/tablet motif in teal. Clean wordmark: "DirectRxGuide"

4.2 Navigation Structure

Nav Item	Destination	Priority
Home	Homepage	P0
Eligibility Checker	5-step checker tool	P0
Compare Drugs	Drug comparison grid	P0
DTP Programs	Program directory index	P0
Learn	Education hub index	P0
For HCPs	HCP education section	P0
About	About page with PharmD bio and independence statement	P0
Newsletter	Newsletter signup	P1

4.3 Key UX Requirements

- All outbound links open in a new tab with a brief exit disclaimer overlay identifying the destination as a manufacturer or government site.

- Every page displays a medical disclaimer in the footer: "DirectRxGuide does not provide medical advice. All content is for informational purposes only. Always consult your healthcare provider before making changes to your medications."
- Trust badge row is visible on every page in the header or hero area: Independent | No Pharma Funding | PharmD-Built | Updated Bi-Weekly.
- Cookie consent banner on first visit compliant with CCPA and VCDPA.
- All pricing data displays a "Last Verified" date prominently adjacent to the price figure.
- Pages not reviewed within 30 days display a "Pending Review" flag on price figures.
- Minimum font size 16px for body text. WCAG 2.1 AA accessibility compliance required.

5. Technical Stack & Architecture

Component	Tool / Service	Tier	Notes
Frontend Framework	React (JSX)	Free	Claude builds components
Hosting	Vercel	Free (Hobby)	Auto-deploys from GitHub
Domain	DirectRxGuide.com via Namecheap	~$10/yr	—
DNS & CDN & Security	Cloudflare	Free	SSL, DDoS protection, CDN
Database	Supabase	Free tier	Anonymous session logs only
Analytics	Google Analytics 4	Free	Custom event tracking
Drug Data Source	Google Sheet (master database)	Free	Manually maintained, bi-weekly
Newsletter	TBD (Beehiiv or Mailchimp)	Free tier to start	Email capture only
Schema Markup	JSON-LD in page head	Free	Drug, MedicalWebPage, FAQPage, Organization schemas
LLM Discoverability	llms.txt at domain root	Free	Created at launch
Version Control	GitHub	Free	All site code stored here

5.1 Data Flow — Eligibility Checker

User completes 5-step form → results generated client-side from Google Sheet drug database → GA4 events fire for each completed step → on results page load, anonymous session row written to Supabase → on outbound link click, UTM-tagged URL opens in new tab with exit overlay → GA4 outbound click event fires.

5.2 Data Flow — Drug Comparison Tool

User selects condition → comparison grid populates from Google Sheet drug database filtered by condition → user applies filters → grid re-renders client-side → GA4 filter and outbound click events fire → outbound link opens in new tab with exit overlay.

5.3 Schema Markup Requirements

Page Type	Schema Type	Key Fields
Drug profile pages	schema.org/Drug	name, brand name, manufacturer, non-proprietary name, drug class, available strength, administration route, DTP cash price
Education articles	schema.org/MedicalWebPage	author (PharmD credentials), medical specialty, last reviewed date, audience type
All pages with FAQ	schema.org/FAQPage	Question + Answer pairs — questions written as user search queries
Site-wide	schema.org/Organization	Platform name, description, independence statement, author credentials
All articles	schema.org/Person (author)	Name, credentials (PharmD), professional affiliations, bio page link

6. Content Requirements at Launch

Content Type	Quantity at Launch	Owner	Update Frequency
Patient education articles	6 articles	PharmD author	As needed / quarterly
HCP education articles	3 articles	PharmD author	As needed / quarterly
DTP program profiles	8 profiles	PharmD author	Bi-weekly price review
Drug comparison data	3 conditions / ~15-20 drugs	PharmD author	Bi-weekly
Glossary	15-20 key terms	PharmD author	Quarterly
About page	1 page	PharmD author	As needed
Privacy policy	1 page	Attorney reviewed	Annual

Content Type	Quantity at Launch	Owner	Update Frequency
Medical disclaimer	Site-wide footer text	Attorney reviewed	Annual
Terms of use	1 page	Attorney reviewed	Annual
llms.txt	1 file at domain root	Technical setup	Monthly update

7. Launch Criteria

The following conditions must all be true before the platform goes live. No exceptions.

7.1 Must-Have (P0) — Hard Launch Gate

- Eligibility checker is fully functional end-to-end including Supabase logging and GA4 event tracking
- Drug comparison grid covers GLP-1/Obesity, Migraine, and Diabetes with all required columns populated
- Minimum 8 DTP program profile pages published with current verified pricing
- Minimum 6 patient education articles published following the 8-element content standard
- Minimum 3 HCP education articles published
- Medical disclaimer appears in footer on every page
- Privacy policy page is live and linked in footer
- Cookie consent banner is functional
- Exit disclaimer overlay fires on all outbound links
- All outbound links open in new tab
- UTM parameters applied to all outbound links
- GA4 is connected and event tracking is verified
- Supabase anonymous session logging is verified
- Schema markup is implemented and validated via Google Rich Results Test
- llms.txt file is live at domain root
- Site loads in under 2.5 seconds on mobile (Cloudflare CDN active)
- All pages are mobile-responsive
- Domain is live and SSL certificate is active

7.2 Out of Scope — v1 (Build in v2/v3)

- Savings calculator
- PDF export for HCP comparisons
- Cross-condition drug comparison
- Patient reviews or ratings on program profiles
- HCP login or portal
- Newsletter content (platform ready, content starts Month 2)
- Any monetization features (affiliate tracking activation, ads, sponsored content)
- Medicare-specific content
- CE/CME content
- Wikipedia / Wikidata contributions

8. Non-Functional Requirements

Category	Requirement
Performance	Page load under 2.5 seconds on mobile. Core Web Vitals: LCP < 2.5s, CLS < 0.1, FID < 100ms.
Accessibility	WCAG 2.1 AA compliance. Minimum 16px body font. Sufficient color contrast. Alt text on all images. Keyboard navigable.
SEO	Every page has unique title tag and meta description. XML sitemap submitted to Google Search Console at launch. robots.txt configured. All images have descriptive alt text.
Security	HTTPS enforced via Cloudflare SSL. No sensitive user data stored. Supabase database is private with no public API exposure. No PII ever written to any database.
Privacy	Cookie consent banner on first visit. GA4 configured to anonymize IP addresses. No advertising or behavioral tracking cookies. llms.txt present at launch.
Uptime	Vercel free tier provides 99.9% uptime SLA. Cloudflare provides additional resilience.
Browser Support	Chrome, Safari, Firefox, Edge — current and one version prior. iOS Safari and Android Chrome fully supported.
Data Freshness	Drug prices and program details reviewed bi-weekly. Stale data (>30 days) flagged with Pending Review indicator. Last Verified date displayed on all price figures.

9. Build Phases & Timeline

Phase	Week	Deliverable	Details
Phase 1	Week 1-2	Core site structure	Homepage, navigation, branding, Vercel deployment, Cloudflare DNS, GA4 and Supabase connected
Phase 1	Week 2-3	Drug comparison tool v1	3 therapeutic areas: GLP-1/Obesity, Migraine, Diabetes. All required columns populated.
Phase 1	Week 3-4	Eligibility checker v1	Full 5-step flow, Supabase logging, UTM tracking, exit overlay on results links
Phase 1	Week 4-5	Education content v1	6 patient articles + 3 HCP articles published following 8-element standard
Phase 1	Week 5-6	Program directory v1	8 DTP program profiles with current verified pricing
Phase 1	Week 6	Launch preparation	Schema markup validation, llms.txt, cookie banner, legal pages, soft launch
Phase 2	Month 2	Growth features	Expand comparison to 6 conditions, savings calculator, newsletter launch, SEO optimization push
Phase 2	Month 3-4	Authority building	PDF export for HCPs, Medicare content, Wikipedia contributions, LinkedIn content program
Phase 3	Month 4-8	Monetization activation	Affiliate tracking (post attorney review), sponsored content, premium HCP tools, newsletter sponsorship

10. Success Metrics & KPIs

Metric	Month 1 Target	Month 3 Target	Month 6 Target
Monthly unique visitors	500-1,000	5,000-10,000	25,000-50,000
Eligibility checker completions	50-100	500-1,000	2,500-5,000
Drug comparison tool uses	100-200	1,000-2,000	5,000-10,000
Outbound clicks to DTP sites	50-100	500-1,000	2,500-5,000
Newsletter subscribers	100	1,000	5,000
LinkedIn followers	200	1,000	3,000
Average time on site	> 2 min	> 3 min	> 3 min

Metric	Month 1 Target	Month 3 Target	Month 6 Target
Domain Authority (Moz/Ahrefs)	5-10	15-20	25-35
LLM citation count (monthly queries)	0	1-2 citations	5+ citations
Supabase sessions logged	50-100	500-1,000	2,500-5,000

11. Legal & Compliance Requirements

Important

Consult a healthcare attorney before activating any affiliate, referral, or sponsored content revenue. The platform may launch with education-only content and tools without attorney review. Monetization requires legal clearance.

Area	Requirement	Pre-Launch Required
Medical Disclaimer	Prominent site-wide disclaimer: platform does not provide medical advice, does not replace patient-provider relationship, all treatment decisions require a healthcare provider.	Yes
Privacy Policy	Full privacy policy per framework in strategy document Section 13. Attorney review recommended.	Yes
Terms of Use	Terms governing site use, limitation of liability, accuracy disclaimers for drug pricing.	Yes
FDA Compliance	Platform is an information aggregator, not a prescriber or seller. All drug information sourced from FDA-approved prescribing information and clearly attributed.	Yes
Anti-Kickback Statute	No referral fees or affiliate payments activated until attorney review confirms compliance. Exit disclaimer on all outbound links is a precautionary measure.	Pre-monetization only
FTC Disclosure	Any future affiliate relationships, sponsored content, or financial ties to manufacturers must be clearly disclosed per FTC guidelines.	Pre-monetization only
HIPAA	Platform designed to operate outside HIPAA scope. No PHI collected. Attorney confirmation recommended before launch.	Recommended
State Pharmacy Laws	Site clearly states it is an informational resource, not a healthcare provider or pharmacy.	Yes

Area	Requirement	Pre-Launch Required
CCPA / VCDPA	Cookie consent banner. Privacy policy addresses California and Virginia user rights.	Yes

12. Open Questions & Decisions Pending

Question	Decision Needed By	Owner
Newsletter platform selection: Beehiiv vs Mailchimp	Before Phase 2 (Month 2)	Jitin
Logo and brand mark design	Before soft launch	Jitin / Designer
Healthcare attorney consultation on HIPAA scope and AKS	Before monetization (Month 4)	Jitin
Google Sheet drug database structure — finalize columns	Before Week 2 build	Jitin + Claude
Exact teal color hex code for brand palette	Before Week 1 design	Jitin
Author bio page content and credential presentation	Before first article publishes	Jitin
Wikipedia contribution strategy — which articles to target first	Month 3	Jitin + Claude

This PRD is a living document and will be updated as the platform evolves. All drug program information is based on publicly available data as of March 2026.
DirectRxGuide.com | Confidential | v1.0 | March 2026
